The Gardiner Judgeship In regard to the appointment of Municlpul Judge J M Larrabee, of Gardiner, we have obtained the following facts Some twenty years ago Mr. Larrabee was I rensurer and Collector of the town for a sories of years during which there were large translictions in bonds that were handled by others as well as he, while the book keeping was seemingly very unaystematic and at settlement there was a deficit of over five thousand dollars in the accounts, of which thirty-eight hundred was made good by Mr Larrabee's bondsmen and seventoen hundred remained unpaid. The details have been stated to us by different parties, but so far as we can learn the people of Gardiner have never believed that Mr. Larrabee was dishones in the matter. He has lived there ever since, and the Gardiner Home Journal says

There was nothing to show that he had There was nothing to show that he had used the money himself, and faw, if any, ever questioned his bonnety. Mr. Larry-boe was elected one of the School Committee the versa after the unfortunate occurrence, and has been elected to several offices since, which shows that his fellow citizens do not have any feelings against

him His fault was more in keeping his accounts than in his intentions. The people of Gardiner knew about all this, and recommended him, and they are to be blanded for his appointment if there is any blamo rather than the Governor, who did not make it until he had satisfied himself that the recommendations were made in good faith.

Elsowhere we publish also a letter to the Portland Press by Rev L Luce of Gardiner, who bears slintlar testimony of the high esteem in which Mr. Larrabed is held in the community where he lives, and as dealres would certainly seem to be entitled vindictive incommittees of the Democratic

A Great Medical Work on Manhood (c) in the service of the first of the service ti ned with much sin dier battons of a like t pattern. The but is the English walking and with much an iter battons of a like intern. The list is the English watking shape, with silver galloon and dark blue line listernived on the frost of the hist, with two rows of the braid going around the erion. The bridst dress of the snald of the twelve dresses is very simply made of white corded slik. On traine, and draped down the front with clouds of white slik tallo. The aquare bodke opens broadly but a six linch pleading of tulle surrounds it like only of Mary Simer's velvet gowns. The ellops sleeves are edged to match, and the vall is en suite. All this alty lightness is to be made exceedingly rich and effocily by an accompanying set of dismonds, which will include a massive diamond cross, a diamond girdle clasp, and slender gold wire bangle bracelets designed for the bride, showing at the top a gold liarguerite (the bride ename) with a drop of dow in its heart, the dow being represented by single white diamonds of rare worth, the cuttre settle gift of the groom's father.
